

Irene M. Villaseñor is a Professor of the Institute of Chemistry, University of the Philippines. She earned her BS, MS and PhD in Chemistry, and MS in Bioethics from the same university. She teaches both graduate and undergraduate courses in Organic Chemistry. Her field of specialization is on the Chemistry of Natural Products. She has more than 50 publications in international and national refereed journals and has mentored more than a hundred Chemistry thesis students. She is currently the program leader of a Department of Science and Technology (DOST)-funded research on the Discovery and Development of Health Products (DDHP). DDHP is a nationwide multi- and interdisciplinary research that aims to produce herbal supplements and drug candidates. She is also actively involved in the Quality Assurance of institutions within the University of the Philippines System.
